Important notes

Using BELIMO damper actuators

The actuators listed in this catalogue are intended for the operation of air dampers in HVAC systems.

Torque requirements

When calculating the torque required to operate dampers, it is essential to take into account all the data supplied by the damper manufacturer concerning cross sectional area, design, mounting and air flow conditions.

Danger

The enclosure of the actuators equipment may only be opened by the manufacturer. It contains no components which the user can replace or repair.

Dampers up to approx. 3 m²

Open/Close actuator
(AC/DC 24 V)

Manual operation with
integral position stop

Versatile applications

The AF... spring return actuators are intended for the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

Improved functional safety

The AF... actuator moves the damper to its normal working position while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

Variable end switch

The AF24-S actuator has one fixed auxiliary switch and one adjustable auxiliary switch which allows angle of rotation of 5% and between 28...94% to be signalled.

Simple installation and commissioning

The actuator is fitted with a universal spindle clamp for quick and easy mounting directly onto the damper spindle. The actuator is also supplied with an anti-rotation strap for fixing it in position. The damper can be operated manually and fixed in any required position. Release of the locking mechanism can be achieved manually or automatically by applying the supply voltage.

Open/Close actuator (AC 230 V)

Manual operation with integral position stop

Versatile applications

The AF... spring return actuators are intended for the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

Improved functional safety

The AF 230 actuator moves the damper to its normal working position while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

Variable end switch

The AF230-S actuator has one fixed auxiliary switch and one adjustable auxiliary switch which allows angle of rotation of 5% and between 28...94% to be signalled.

Simple installation and commissioning

The actuator is fitted with a universal spindle clamp for quick and easy mounting directly onto the damper spindle. The actuator is also supplied with an anti-rotation strap for fixing it in position. The damper can be operated manually and fixed in any required position. Release of the locking mechanism can be achieved manually or automatically by applying the supply voltage.

Dampers up to approx. 3 m²

Modulating actuator (AC /DC 24 V)

Control DC 0...10 V

(The type AF24-SR20 is available with phasecut input)

Position feedback DC 2...10 V

Manual operation with integral position stop

Versatile applications

For the operation of air dampers that perform safety functions (e.g. frost and smoke protection, hygiene, etc.).

Improved functional safety

The AF24-SR actuator moves the damper to its normal working position while tensioning the return spring at the same time. If the power supply is interrupted, the energy stored in the spring moves the damper back to its safe position.

The actuator is overload proof, needs no limit switches and halts automatically at the end stop.

Simple installation and commissioning

The actuator is fitted with a universal spindle clamp for quick and easy mounting directly onto the damper spindle. The actuator is also supplied with an anti-rotation strap for fixing it in position. The damper can be operated manually and locked in any required position. Release of the locking mechanism can be achieved manually or automatically by applying the supply voltage.

If manual operation is used while the power supply is still switched on, the actuator will check itself by running first to the start position and then to the position dictated by the control signal Y.

General mounting accessories

KH8, KH6

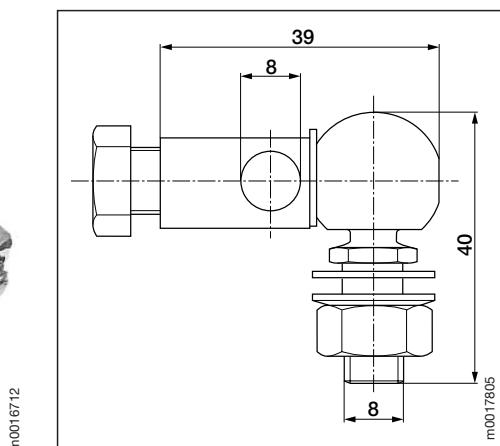

KH8 Universal crank arm

Zinc-plated steel; suitable for damper spindles 10...18 mm diameter or 10...14 mm², slot width 8.2 mm.

KH6 Universal crank arm

as Type KH8, but slot width 6.2 mm.

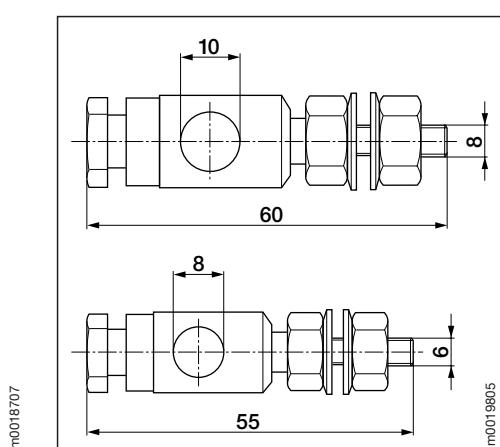

KG8

KG8 Ball joint

Zinc-plated steel; suitable for use with KH8 universal crank arms and round steel rod 8 mm diameter.

KG10, KG6

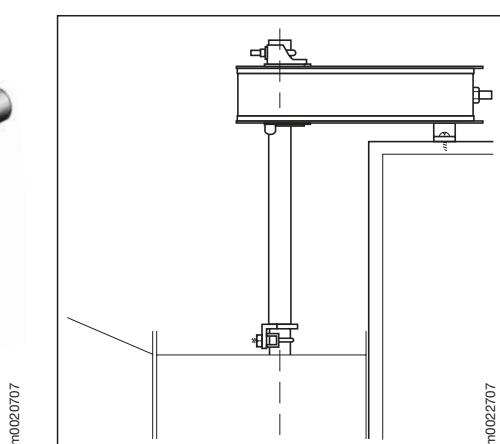

KG10 Ball joint

Zinc-plated steel; suitable for use with KH8 and KH6 universal crank arms and round steel rod 10 mm diameter.

KG6 Ball joint

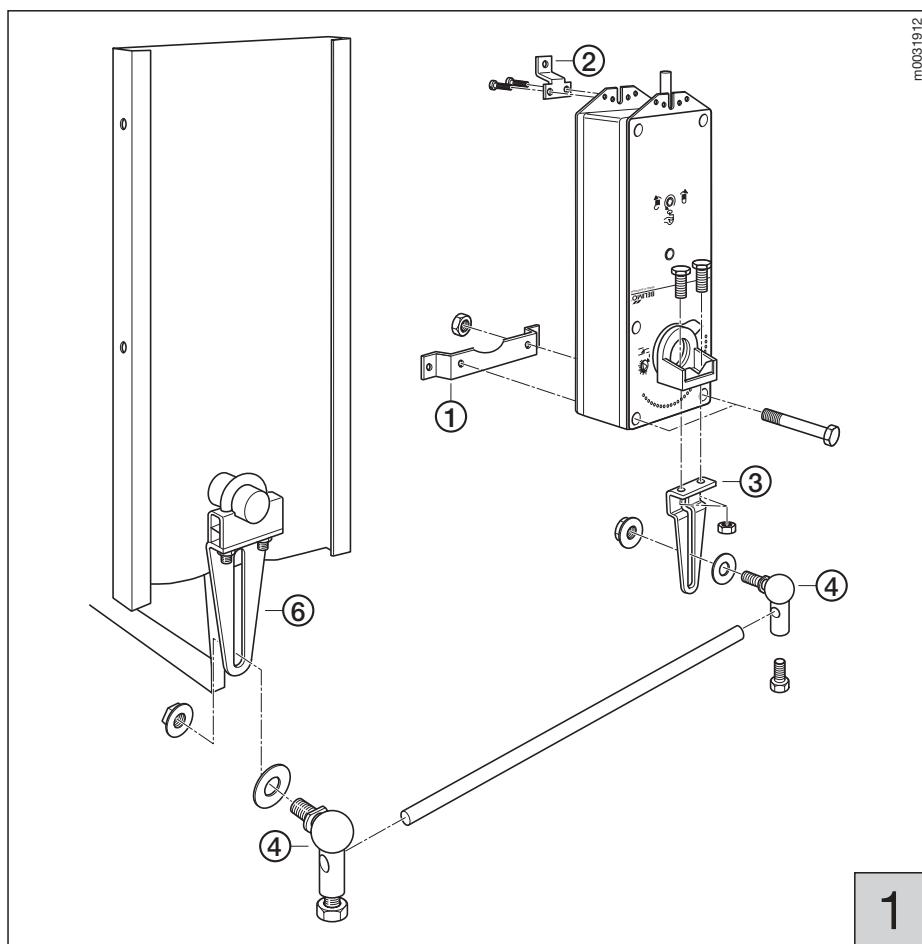

Zinc-plated steel; suitable for use with KH6 universal crank arms and round steel rod 8 mm diameter.

AV10-18

AV10-18 Universal spindle extension

approx. 240 mm long; for damper spindles 10...18 mm diameter or 10...14 mm².

Application

The ZG-AF mounting accessory is used for fitting this type of spring return actuator and for actuating safety dampers when it is impossible to mount the actuator directly on the damper spindle.

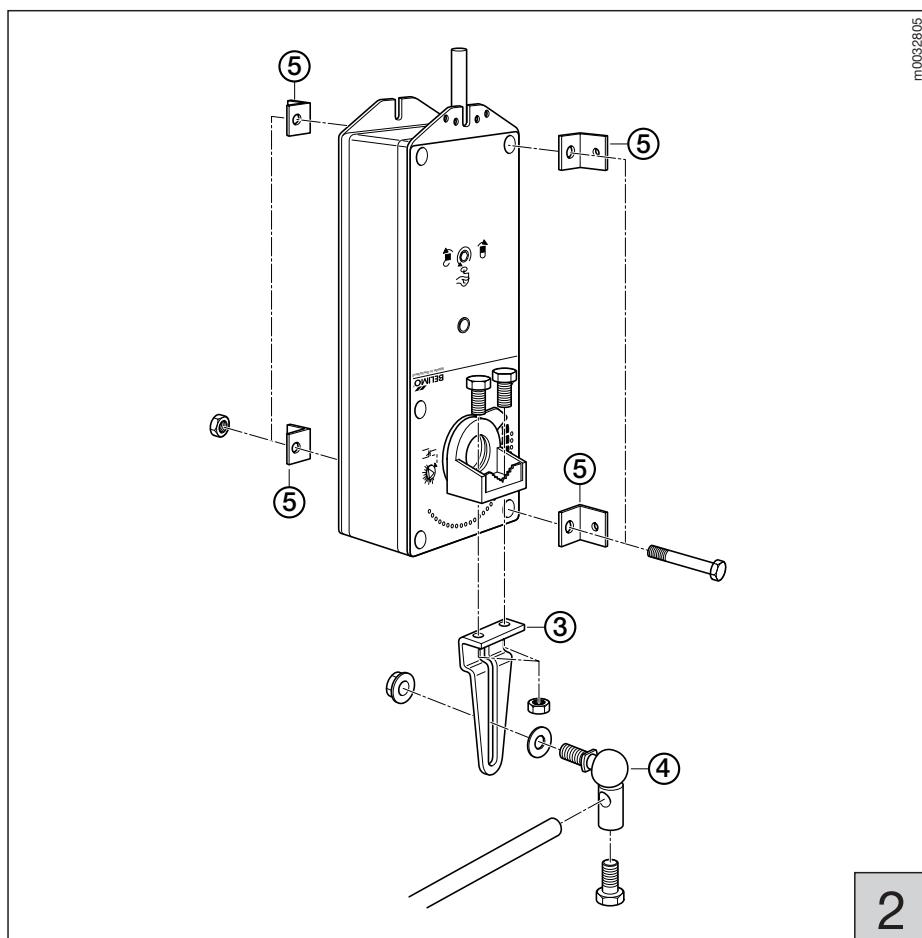

Kit specification

- ① – Front mounting bracket
- ② – Rear mounting bracket
- ③ – Crank arm AF
- ④ – 2 ball joints KG8
- ⑤ – 4 mounting brackets
 - 2 screws M6 x 16
 - 2 screws M6 x 65 with nuts
 - 5 self-tapping screws
- ⑥ – Universal crank arm:
order separately, not included with
the ZG-AF mounting accessory.

1

Flat mounting (Fig. 1)

The spring return actuator is attached to the air duct by means of the two brackets.

Side mounting (Fig. 2)

In this case four identical brackets are used for attaching the actuator instead of the other two brackets.

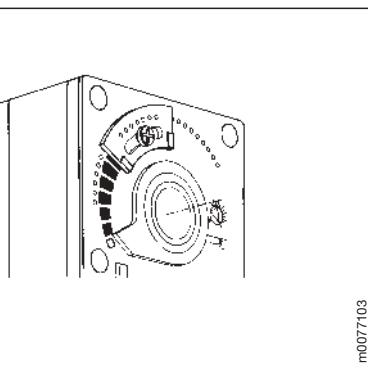

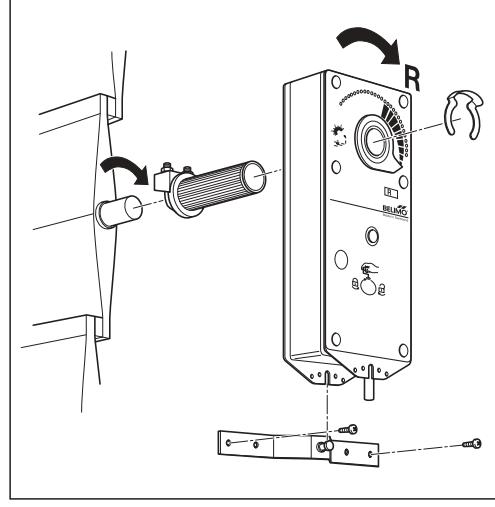

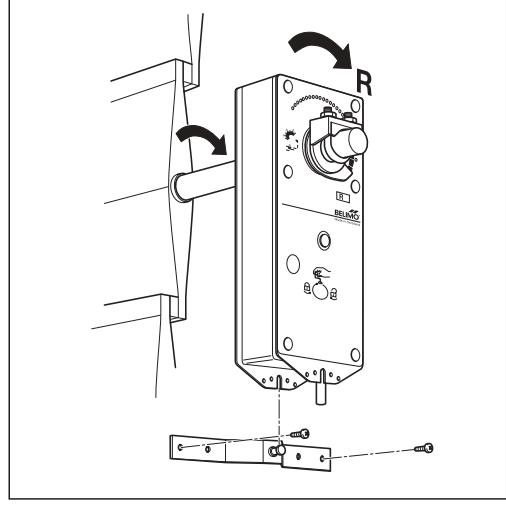

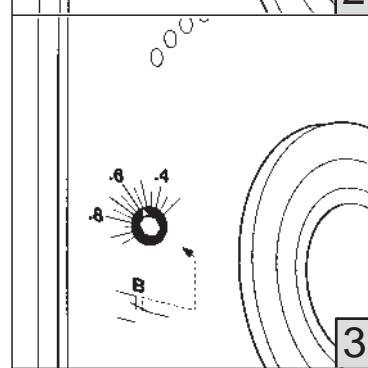

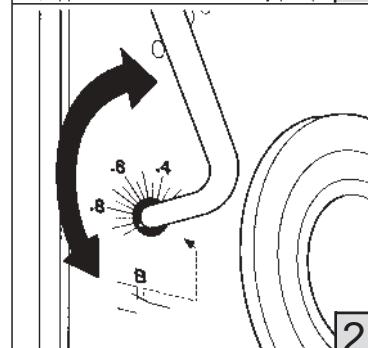

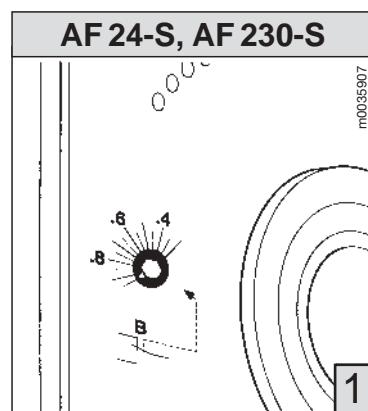

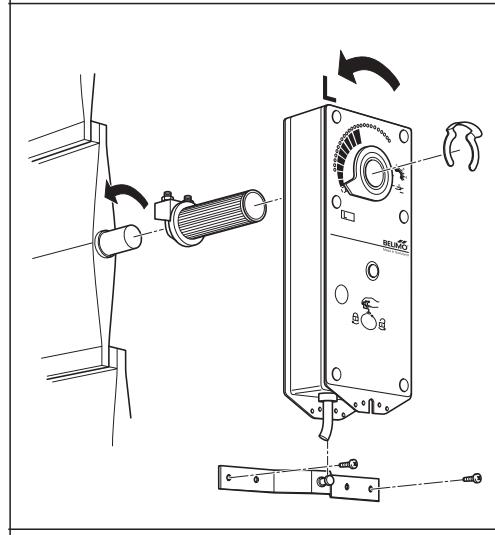

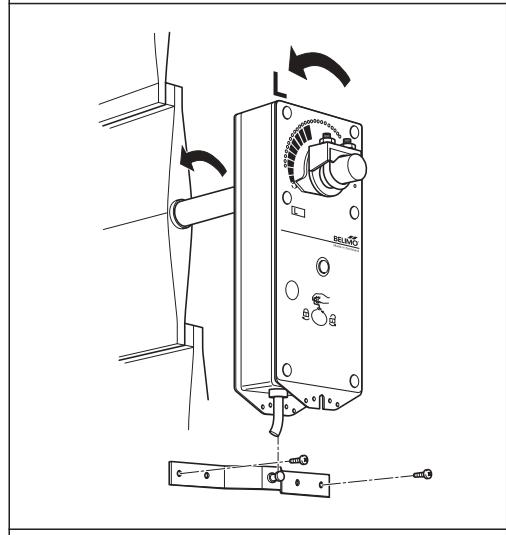

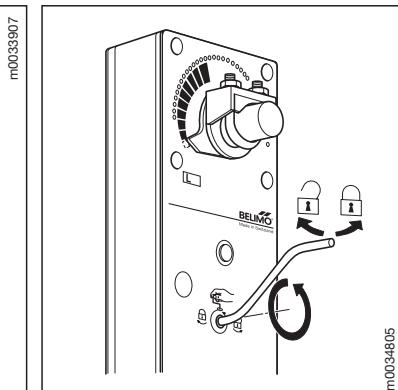

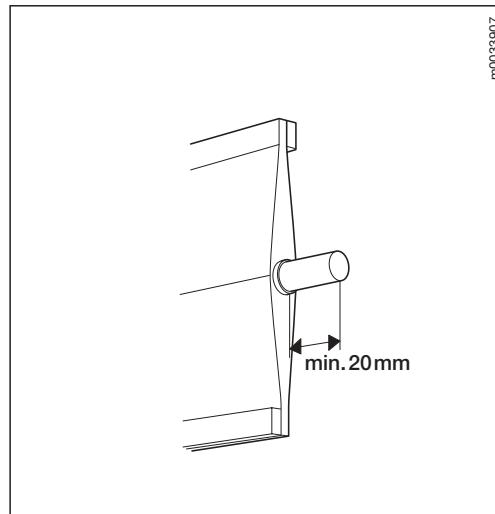

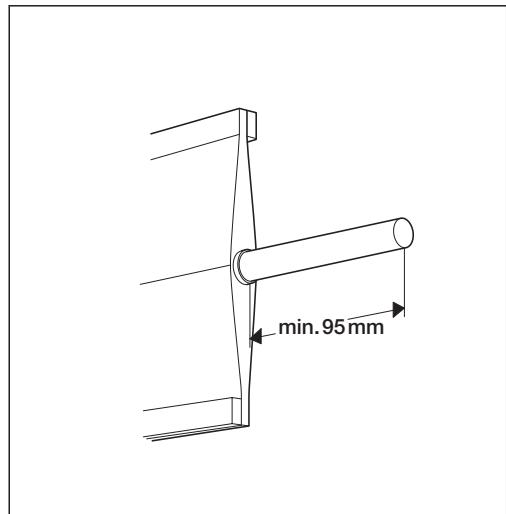

2

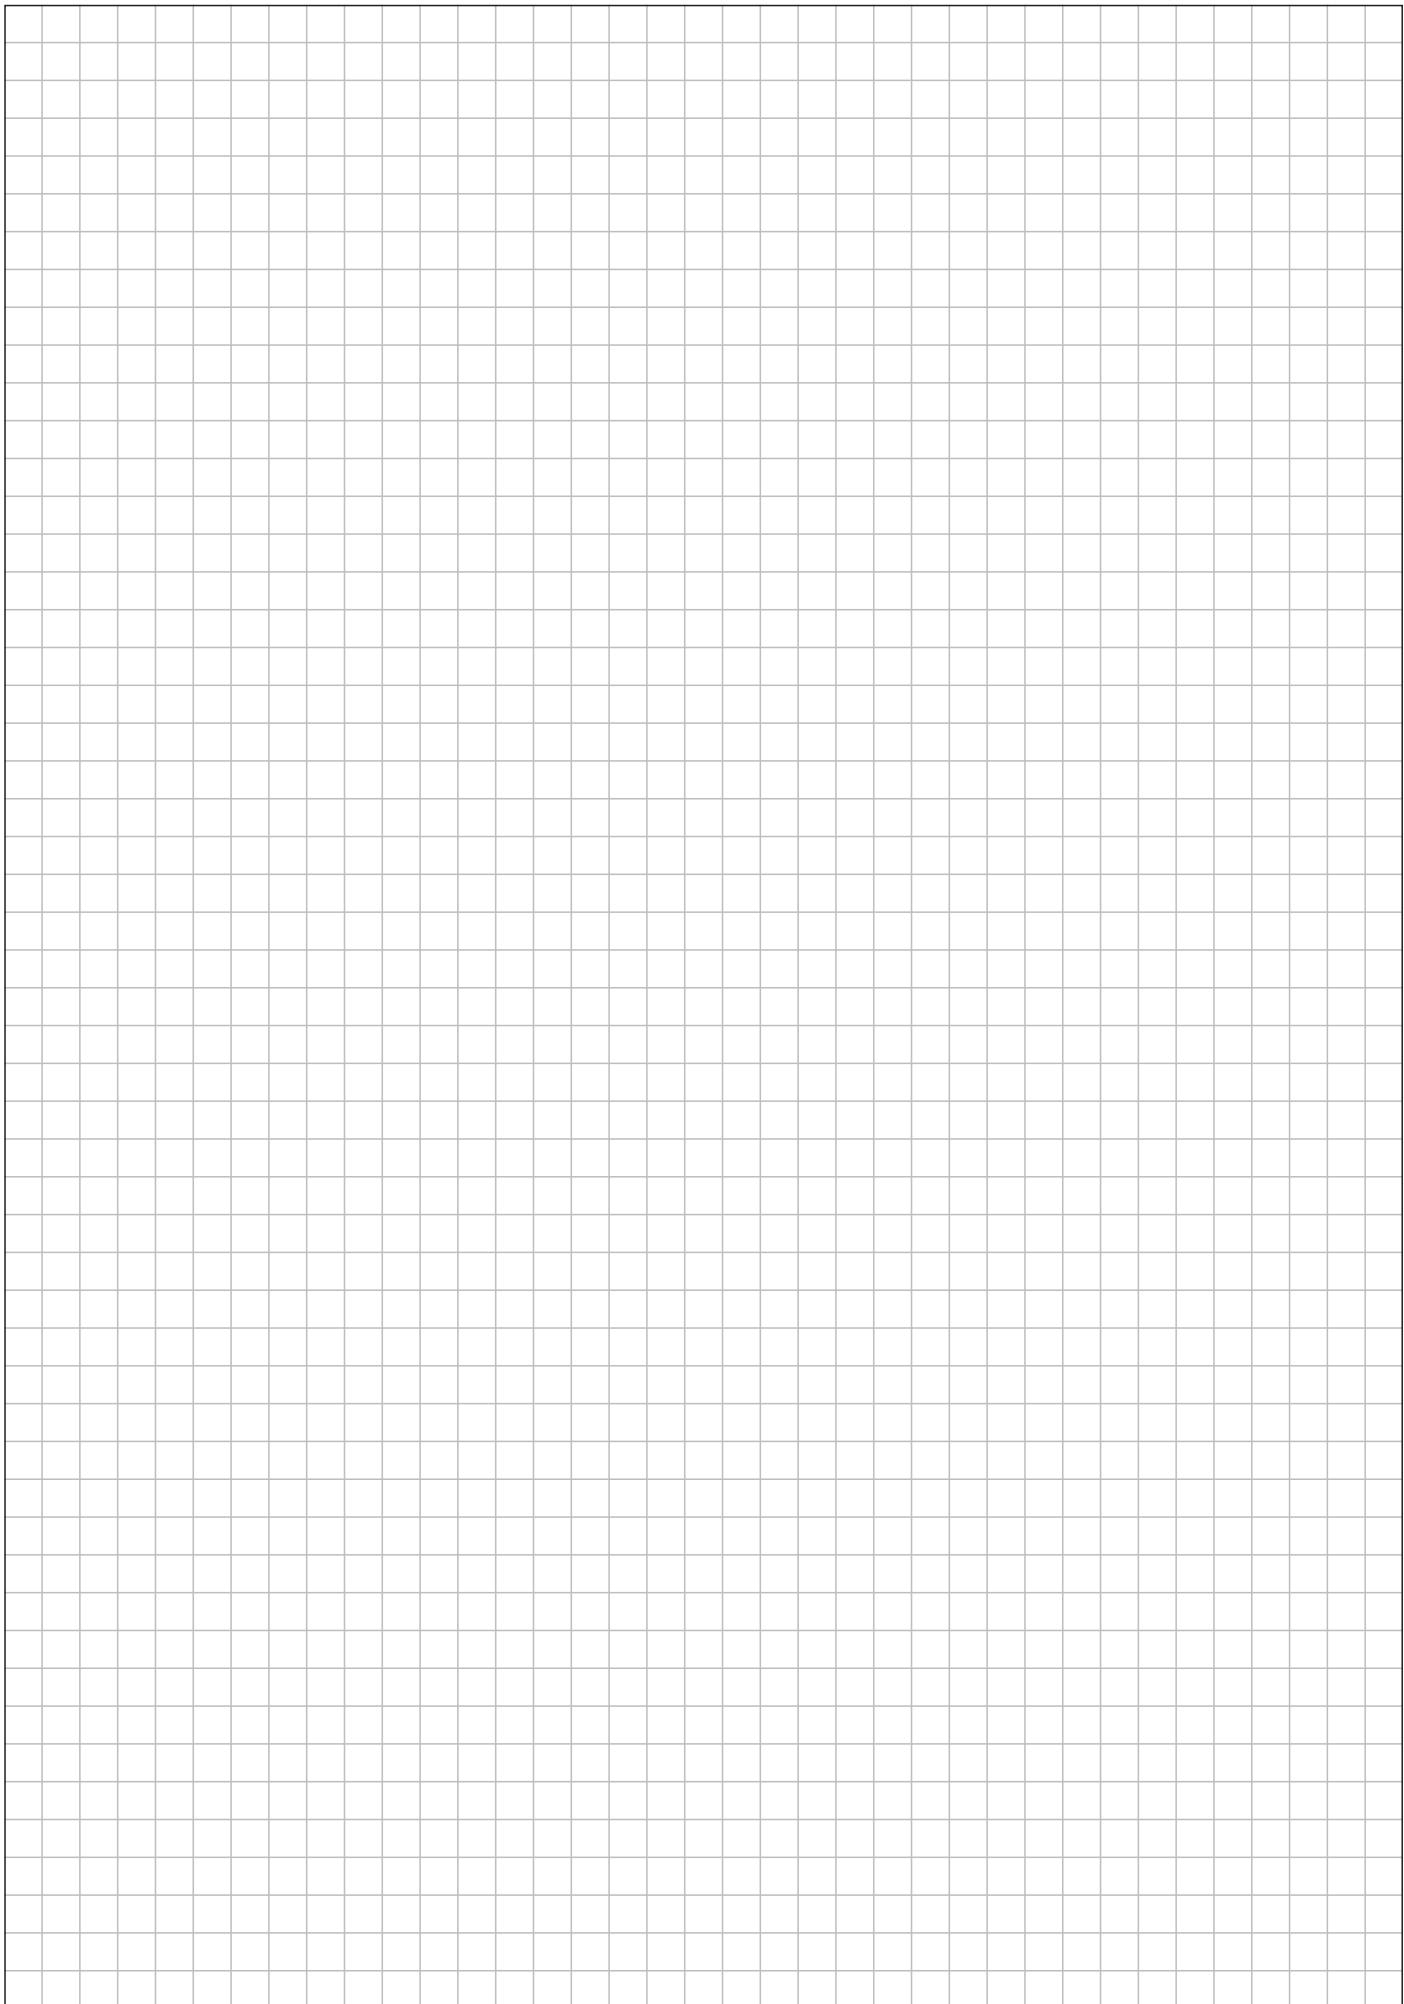

Linkage mounting (Figs. 1 and 2)

A slotted lever (KH8) is substituted for the U-bolt in the shaft adaptor of the spring return actuator. A second slotted lever is attached to the damper spindle. The rotation of the actuator is transmitted to the damper spindle by means of a connecting rod and two ball joints bolted to the slotted levers.

BELIMO

Air applications

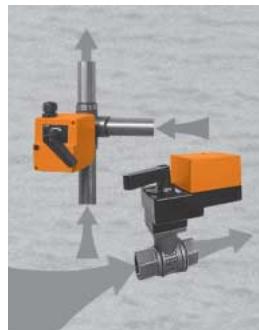

Standard actuators and spring-return actuators for air control dampers in HVAC systems

Safety actuators for motorizing fire and smoke extraction dampers

VAV systems for individual room air control

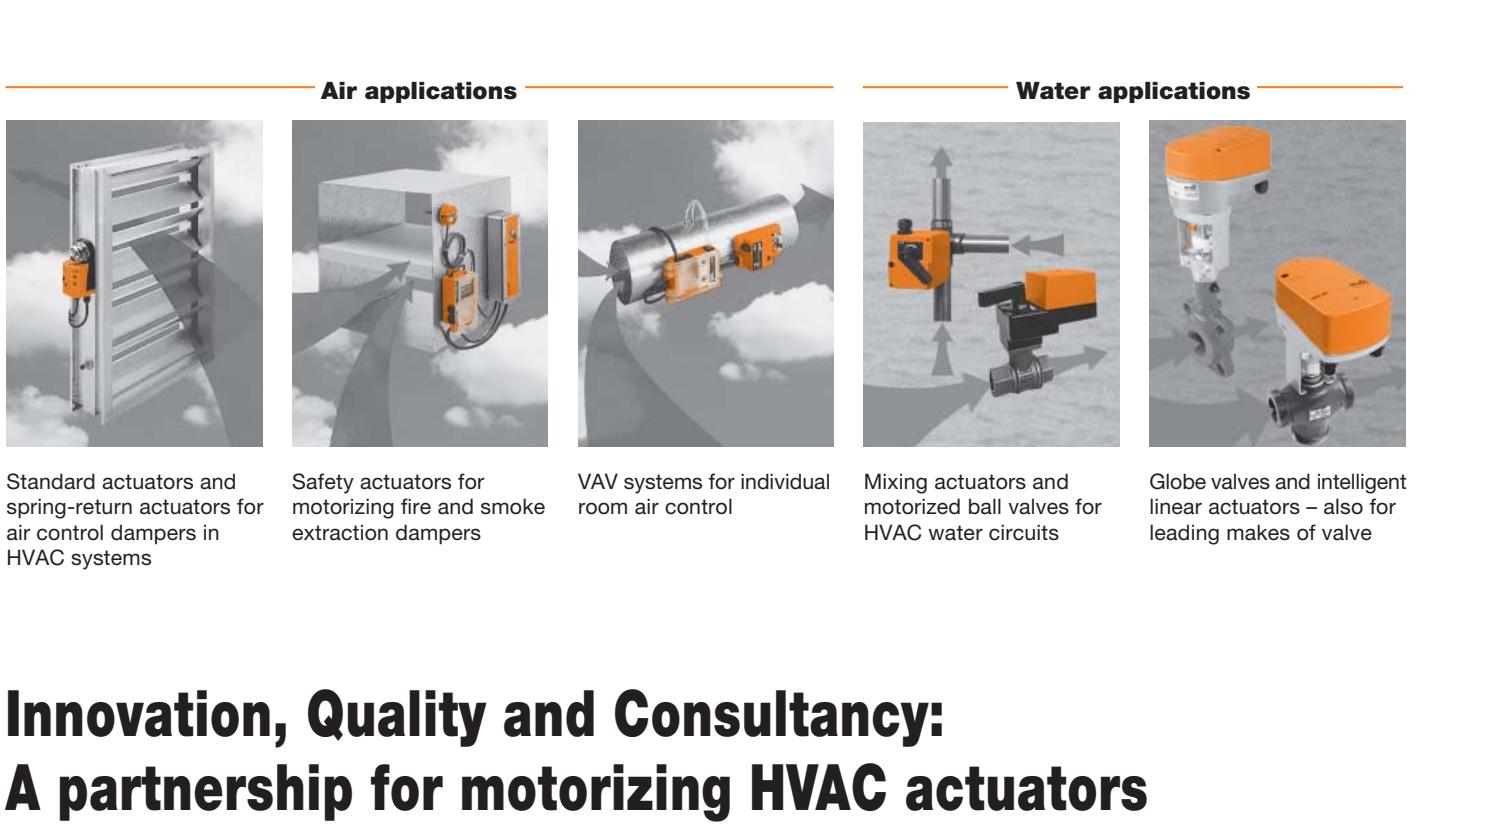

Mixing actuators and motorized ball valves for HVAC water circuits

Globe valves and intelligent linear actuators – also for leading makes of valve
